

FOR THE ULTIMATE FLAT CEILING

The Backing of a World Leader

Lafarge is the world's largest producer of construction materials including gypsum products, aggregates and cement. The preservation of natural resources and respect for the needs of people and the environment are fundamental to the organisation's business approach and philosophy.

Plasterboard, jointing and associated products made in the United Kingdom by Lafarge Plasterboard are manufactured in accordance with management systems certified to BS EN ISO 9001: 2000 (quality) and BS EN ISO 14001: 2004 (environment)

Ceiling Safety

The ceiling systems within this literature will not support foot traffic. It is important that the recommended loading stated in this literature is not exceeded; if in doubt please contact your local Lafarge representative.

It is important that the maximum size of a ceiling without either a supporting partition, joint or break should be 15m x 15m (225m²).

Large ceiling components are designed to perform as a system; none of the components should be interchanged or substituted with that of another manufacturer. Failure to comply with this information will effect the overall ceiling safety and invalidate any Lafarge Guarantee.
